

Use and maintenance

Operating guidelines CEX410

Fill solution tank with fresh water. Add low foam detergent

Plug in power cable

Adjust handle for ergonomic operator height

Switch on vacuum and solution and Turn on the main switch to start the machine

Press handle switch and start cleaning by moving the machine backwards. When you near the end of your cleaning path release the handle switch and continue a new cleaning path. Overlap slightly to insure no dirt is missed

Adjust the brush pressure to have the desired traction according to your needs as this changes with different type of carpets

Optional upholstery nozzle for furniture cleaning and optional floor tool for cleaning in difficult areas available

To install accessory: remove the suction hose on the lid and connect it to the empty left connection. Connect the accessory suction hose in the lid and connect the solution hose in quick coupling in the right bottom part. When both are connected make sure the machine is parked on the stand and start the machine with pump and suction buttons activated and start working with the accessory.

Unplug the machine

Maintenance

Operating guidelines CEX410

Unplug the machine

Empty the recovery tank by using the drain hose

Clean the recovery tank

Clean the float ball system inside. Clean the lid gasket

Empty the solution tank

At the bottom of the machine you can access to the solution filter. Keep the filter clean

Pull the brush out by the left side and clean it. To install again connect the right side first then push the left side of the brush in place. Remove the suction nozzle and clean it

When the brush is removed clean the brush housing and if needed check the two spray nozzles

Store machine in parked position

Leave recovery tank cover open
