## The Revolutionary SPHERGO® Flat Surface Cleaning System

The SPHERGO® surface-cleaning base tool together with MicroWorks® microfiber cleaning pads – was developed specifically to address problems presented by using traditional rag cleaning and wiping systems for flat surfaces.

Musculoskeletal disorders (MSDs), including back and trunk injuries, carpal tunnel syndrome, bursitis, and tendonitis, are cumulative “ergonomic injuries” that commonly occur in workers in the cleaning and sanitation industry. The costs of MSDs to businesses can be massive in both human and financial terms.

### Why SPHERGO®?

While manual cleaning with rags can be effective, the process requires a great deal of wrist motion and physical bending for extended periods. Rag cleaning results in the highest rate of fatigue and potential for MSDs. The SPHERGO® Surface Cleaning System is an ergonomic breakthrough, developed through extensive research and testing to address the physical challenges of manual cleaning of flat vertical and horizontal surfaces (walls, floors, mirrors, windows, etc.).

**MSDs** account for 33% of occupational injury and illness cases.

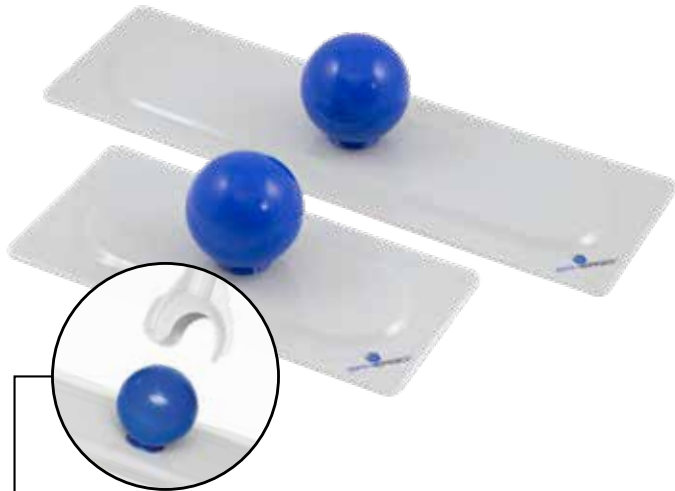

- When used with the telescoping or extended reach pole, the flat pad surface rotates around the ball handle, dramatically minimizing the wrist motions, repeated torso flexion, and straining movements that can lead to MSDs
- Tested according to REBA (Rapid Entire Body Assessment) guidelines, the SPHERGO system was found to lessen flexion, extension, and radial/ulnar deviation when cleaning, compared to the results when using a standard rag or mopping system

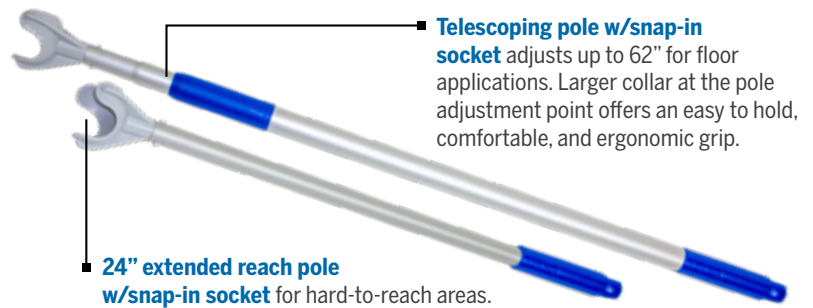

■ **Patent-pending spherical ball handle** is engineered for optimal ergonomic comfort, allowing a more neutral positioning of the wrist for greater comfort and productivity while minimizing musculoskeletal stresses common to manual cleaning processes.

### SPHERGO® Flat Surface Cleaning System

- Faster and more efficient – greater surface area is cleaned in one motion
- Improves productivity, reduces fatigue, Increases job satisfaction
- Medium base tool for use with 5" x 11" microfiber flat pad for horizontal and vertical flat surfaces (counters, walls, windows, etc.)
- Large base tool for use with 5" x 16" microfiber flat pad and telescoping handle for floor care
- Lightweight: SPHERGO® medium tool plus pad weighs less than 0.5 lbs; SPHERGO® large tool plus telescoping pole w/socket weighs less than 1.5 lbs
- Hook and loop fabric for attaching microfiber pad
- Tools can be incorporated into existing microfiber protocols

■ **Spherical ball** easily attaches to poles by popping it into the socket.

■ **Telescoping pole w/snap-in socket** adjusts up to 62" for floor applications. Larger collar at the pole adjustment point offers an easy to hold, comfortable, and ergonomic grip.

■ **24" extended reach pole w/snap-in socket** for hard-to-reach areas.
