

# High Speed Burnishing

## PURPOSE:

To maintain clean, safe and attractive floors.

## REQUIRED SUPPLIES & EQUIPMENT:

- High speed burnisher (500-2000 rpm) with burnishing pad
- Wet mop handle and looped-end banded mop
- Mop bucket with wringer
- Set of "Wet Floor" signs
- Dust mop
- Dustpan and brush
- Approved cleaning detergent solution appropriate to the area
- Burnishing compound

## PROCEDURE #8:

- Prepare area – Set up "Wet Floor" signs. Move obstacles such as furniture.
- Dust mop floor – Follow Procedure #1. Use clean dust mop.
- Damp mop – Follow Procedure #2. Be sure no detergent residue is present when floor is dry.
- Machine burnish floor – Place machine in position. Apply burnishing compound. Move in a straight line, forward and back. Allow a slight overlapping on each pass. One complete repetition, forward and back, should be sufficient.
- Dust mop again – Pick up any dust resulting from burnishing operation. Use a clean dust mop.
- When finished – Remove signs. Return furniture and other items to proper locations.
